DISC HARROW RHTS SERIES

Designed to work in a simple and safe manner, to be easily set-up and operated. They adapt to different ground condition.

The main chassis, the discs section, the hook and the transportation axis are made in structural steel, which is highly resistant to torque.

It carries out soil preparation, weed control and incorporation of waste tasks.

They have five configuration positions for the attack angle in both disks sections, which allows for flawless harrowing in any kind of terrain.

With the precision screw that makes the balancing of the equipment an easy task.

26" x 1/4" disks optional.

The hook plates may be adjusted so that the device works directly behind the tractor or to its left or right, as required.
