MOULDBOARD PLOW

AVB SERIES

This type of plow is ideal for moving the soil regularly and turn the waste and existing vegetation on the surface, achieving better integration and decomposition without damaging the soil structure and reduce wind erosion.

The moilboard holder is designed for quick clamping and ideal for a better penetration angle.

With a strong chassis with low weight designed to resist the forces that the soil preparation require.

Vertical position cylinder for a natural and smooth rotation.

Inverter flow regulator valve, which ensures 180 ° in a single hydraulic action.

Sectional moldboard to replace only the parts of highest wear. These are made of high quality boron steel.

It has a screw fuze to prevent damage to the equipment in case of getting stuck.

SPECIFICATIONS		AVB-200H	AVB-300H	AVB-400H
Hitch type		3 Pt., Cat. II y Cat. II QH	3 Pt., Cat. II y Cat. II QH	3 Pt., Cat. II, III y Cat. III QH
Variable working width	in	34-30	43-31	73 - 67
Maximum cutting depth	in	10" - 14"	10" - 14"	10" - 14"
Reversion		Hydraulic	Hydraulic	Hhydraulic
Cylinder	in	3 x 8	3 x 8	3 x 8
Number sections		2	3	4
Power required	hp	50-80	90-120	120-150
Approximate weight	lb	1132	1454	2258
