BISON

SUBSOILER MULTICULTIVATOR MCC SERIES

Designed to rip and remove in one step and completely any terrain permitting a deep penetration breaking up the topsoil and shatter. As a result it provides oxygen to the earth.

The shanks can be located at any distance between them, and there two parallel bars reduces the use of power.

The main frame has two bodies that permit shanks to be located, this provides fluid incorporation of the harvest waste avoiding stocked shanks, this function makes it unique in our market.

Available with three, five, seven, nine, eleven, thirteen and fifteen shanks. (Measure adjustable desired).
