SUBSOILER

SVH SERIES

YOUR STRONGEST ALLY

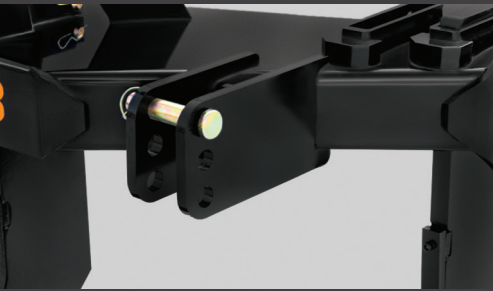

SUBSOILER SVH SERIES

A wide range of subsoilers covering the various needs of the farmer.

The ideal solution for ripping terrain. The deep-penetrating shanks break up topsoil and shatter compacted subsurface layers. As a result, the air and water are better absorbed throughout the soil, promoting plant growth.

Three to five widely spaced shanks (fixed or adjustable positions).

Equipped with 3 shanks.

SVH-5-3 come with an optional soil pulverizer, which breaks up clods.

Adjustable shank height and hassle-free replacement.

Multi-tiller points: rip through terrain by cutting the subsoil horizontally without turning the topsoil.
